

IR-PVC - Price Variation Clause Calculator

Promotional Pitch for Railway Contractors

Hindi Version (Primary)

साहब, यहाँ सब लोग 20-30 साल का experience रखते हैं। बारिश में खड़े होकर measurement लिया है, रातों को जागकर bills तैयार किए हैं। ये experience कोई replace नहीं कर सकता।

लेकिन एक बात बताइए – जब हम PVC calculation के लिए 4-5 घंटे बैठते हैं... index ढूँढना, percentage निकालना, formula लगाना... क्या हमारी skill use हो रही है? क्या हमारा experience काम आ रहा है? नहीं। बस calculator और Excel में numbers डालना। Same काम, बार-बार। ये काम हमारे level का नहीं है।

मैंने एक simple tool बनाया है – IR-PVC। आपका contract details डालो, bill period select करो, और PVC calculation ready। 10 indices? Automatic fetch। Steel JPC rates? PDF upload करो, 2 minute में extract। 100% accuracy। जैसे एक experienced accountant आपके लिए काम कर रहा हो।

ये हमारा काम replace नहीं कर रहा, साहब। ये हमारा valuable time protect कर रहा है waste होने से। वो time, आप दूसरी site visit कर सकते हैं, important meeting attend कर सकते हैं, या simply... आराम कर सकते हैं। Family के साथ time बिता सकते हैं।

30 साल experience वाला contractor 5 घंटे PVC calculation में बैठे... ये respect नहीं है, साहब। Technology को हमारी मदद करनी चाहिए। हम technology के गुलाम नहीं बनने चाहिए।

Try करिए। अपने time को वो value दीजिए जिसका वो हकदार है।

IR-PVC - Because Your Time Deserves Better

English Version

Sirs, everyone here has 20, 30 years of experience. We've stood in rain taking measurements, spent sleepless nights preparing bills. That experience cannot be replaced.

But tell me one thing – when we sit for 4-5 hours doing PVC calculations... searching for indices, calculating percentages, applying formulas... is our skill being used? Is our experience being used? No. Just punching numbers in calculator and Excel. Same work, again and again. This work is below our level.

I've built a simple tool – IR-PVC. Enter your contract details, select bill period, and PVC calculation is ready. 10 indices? Automatic fetch. Steel JPC rates? Upload the PDF, extracted in 2 minutes. 100% accuracy. Like having an experienced accountant working for you.

This is not replacing our work, sirs. This is protecting our valuable time from being wasted. That time, you can visit another site, attend an important meeting, or simply... relax. Spend time with your family.

A contractor with 30 years experience sitting for 5 hours on PVC calculations... that is not respect, sirs. Technology should help us. We should not become slaves to technology.

Try it. Give your time the value it deserves.

IR-PVC - Because Your Time Deserves Better

Key Features to Highlight

Manual Process	With IR-PVC
4-5 hours per bill	10-15 minutes
Hunt for 10 different indices	Auto-fetched from official sources
Manual Steel JPC extraction	AI-powered PDF extraction
Calculation errors common	100% formula accuracy
Paper-based record keeping	Digital records, instant retrieval
One bill at a time	Bulk processing available

Social Media Versions

WhatsApp Status (Hindi)

 Railway Contractor हैं?

PVC calculation में 5 घंटे लगते हैं?

IR-PVC try करें - 15 minutes में complete

- ✓ Auto index fetch
- ✓ Steel JPC extraction
- ✓ 100% accuracy

आपका time valuable है। Waste मत होने दीजिए।

LinkedIn Post

After 25+ years in railway contracting, I realized something:

We spend more time on PAPERWORK than actual CONSTRUCTION.

PVC (Price Variation Clause) calculations alone take 4-5 hours per bill:

- ➡ Searching 10 different price indices
- ➡ Downloading JPC steel rates
- ➡ Applying complex formulas
- ➡ Cross-checking calculations

This isn't engineering. This is data entry.

That's why we built IR-PVC:

- ✓ Auto-fetch all 10 indices from official sources
- ✓ AI extraction of 34 JPC steel items
- ✓ Railway-formula compliant calculations
- ✓ Generate professional PDF reports

Result? 5 hours → 15 minutes.

Because contractors should be on site, not on spreadsheets.

Testimonial Template

“पहले एक PVC bill में पूरा दिन लग जाता था। अब IR-PVC से lunch से पहले तीन bills complete हो जाते हैं। Team को site पर भेज सकता हूँ office work के बजाय।”

- [Contractor Name], [Company], [Years] years experience

Call-to-Action Options

1. **Direct:** “Try IR-PVC free at irpvc.in”
2. **Emotional:** “Give your time the respect it deserves”
3. **Practical:** “Calculate your first PVC bill in 15 minutes”
4. **FOMO:** “500+ contractors already saving 4 hours per bill”

Target Audience Pain Points

1. **Time waste** – Hours spent on calculations that don't need expertise
2. **Index hunting** – Searching multiple websites for latest rates
3. **Steel JPC complexity** – 34 items, fortnightly rates, city-wise data
4. **Calculation errors** – Manual formula application leads to mistakes
5. **Record keeping** – Paper files, difficult to retrieve old bills
6. **Staff dependency** – Trained staff leaving = knowledge loss

IR-PVC Solutions

1. **Automation** – One-click calculations
 2. **Auto-fetch** – Direct from PPAC, Labour Bureau, NIC
 3. **AI extraction** – Upload PDF, get all 34 items
 4. **Built-in formulas** – Railway-compliant, no errors
 5. **Digital records** – Search any bill instantly
 6. **Standardization** – System knows the process, not just people
